DETAILED ACTION

As a preliminary matter, the Examiner notes that it is not necessary to set forth the subject matter of cancelled claims. Cancelled claims may also be listed short hand, for example, claims 1-88 (cancelled) or similar variation thereof.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 89-132 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The Specification does not enable methods of medical treatment and compositions for medical treatment containing tetrameric oxygen (O4).

The nature of the invention:

The invention is directed to method of using as a medical treatment and compositions for use in medical treatment containing tetrameric oxygen (O4).

The state of the prior art and the predictability or lack thereof in the art:

There does not appear to be any prior art directed to the use of tetrameric oxygen (O4) as claimed. Further, there is insufficient evidence to establish that O4 exists, much less be prepared and/or isolated. At most, the existence of O4 has been theorized, however, the disclosed stability is in the realm microseconds. As such, even if O4 does exist, because the molecule would only

Application/Control Number: 10/574,526

Art Unit: 1616

exist for microseconds, there does not appear to be any practical method of preparing a composition which can be used to treat a given condition. See Schroder, pp. 573-574.

The amount of direction or guidance present and the presence or absence of working examples:

The Specification alleges that there is a product containing O4 in an aqueous solution, however, said assertion is suspect in view of the above.

The breadth of the claims and the quantity of experimentation needed:

The claims are broad in that the claim the use of tetrameric oxygen. As such, in light of the above, one of ordinary skill in the art would be required to do undue experimentation in order to show that O4 exists and prepare compositions that would enable O4, if it does exist, to be stable enough to be used in medical treatment.

Conclusion

A facsimile center has been established in Technology Center 1600. The hours of operation are Monday through Friday, 8:45 AM to 4:45 PM. The telecopier number for accessing the facsimile machine is 571-273-8300.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Frank Choi whose telephone number is (571)272-0610. Examiner maintains a compressed schedule and may be reached Monday, Tuesday, Thursday, Friday, 6:00 am - 4:30 pm (EST).

If attempts to reach the Examiner by telephone are unsuccessful, the Examiner's Supervisor, Johann R. Richter, can be reached at (571)272-0646. Additionally, Technology Center 1600's Receptionist and Customer Service can be reached at (571) 272-1600.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). Frank Choi
